

# COVID-19 Updated Isolation and Exposure Guidance

**Calculating number of days:** If you **test positive** for COVID-19 and have symptoms, Day 0 is your first day of symptoms. Day 1 is the first full day after your symptoms developed. For **asymptomatic cases**, Day 0 is the date of the positive test; however, if symptoms develop within 10 days, then the clock restarts at Day 0 on the day of symptom onset. For **exposures** Day 0 is the day of the last exposure to the positive case.

TEST  
POSITIVE FOR  
COVID-19

## ISOLATE - For 5 days, regardless of vaccination status

- Report positive case to BVCP Director and follow school guidance.
- If unable to wear a mask, isolate at home for 10 days.

### With Symptoms:

You can end isolation **5 days after** symptoms first appeared.

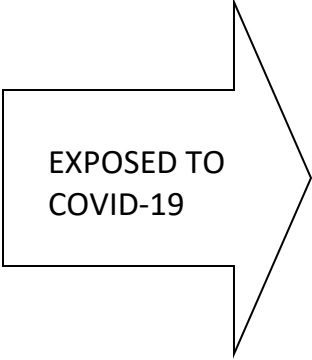

- **IF:** 24 hours with no fever without the use of fever-inducing medications
- **IF:** Other symptoms of COVID-19 are improving (loss of taste/smell may last weeks and should not delay end of isolation)
- **AND:** Wear a well-fitting mask for the following 5 days when around others, both at home, and outside-of-the-home\*

### Without Symptoms:

- **Isolate for 5 days** since your positive COVID-19 test. Wear a well-fitting mask for the following 5 days when around others, both at home and outside-of-the-home\*

\*Alternatively, parents may opt to use a **test-base strategy** to allow students their masks sooner:

- If they have 2 sequential negative antigen tests, 48-hours apart, with the first test occurring on day 6, masks can be removed after the second negative test.
- If either test is positive, they should continue wearing a mask and wait at least 48 hours before taking another test. They should continue wearing a mask and take antigen tests 48 hours apart until they have 2 sequential negative test results.

EXPOSED TO  
COVID-19

## After exposure, start precautions immediately:

- **No quarantine** is necessary, per updated CDC guidelines
- **Wear a well-fitting mask for 10 days** around others
- Test on day 5 (or as soon as possible) thereafter your exposure
- **If unable to wear a mask**, may return to school after day 10.
- If symptoms develop, **stay home**, isolate immediately and get a test

These procedures outline general guidelines, but each case is assessed based on the facts of each unique situation.
